* Double sided M.2 modules do not fit the Sonnet M.2 4x4 Card

† [macOS compatibility requires a firmware update which must be installed under Windows.](#)

‡ These modules are 120mm long, and the card accomodates only 80mm SSD M.2 devices.

§ Version without heat sink

Sonnet has tested many, but not, all of the above SSDs. We rely on the manufacturers data, and cannot guarantee compatibility.
